Contents

Introduction 15

I. Linguistic Phenomenology as the Proper Way to a Rational *Weltanschauung* 21

Preliminaries 21
Introduction: *Weltanschauung* and *Weltanschauung* discourse 22
A note on the relationship "the Reality – knowledge" 25
Some technical details 27
Justification of the linguistic-phenomenological approach to *Weltanschauung* 28
Speaker's knowledge of what she says 33
Supplementary comments on the justification of the linguistic-phenomenological approach 37
An excursus 40
A historical comment 43
A critical comment on search for certainty: preliminaries 45
Substantiation of the critique of scepticism and of search for certainty 48
An additional argument against Radical Scepticism 52
An additional note on *cogito* 53

II. 'Know that' as the Central Relation Constituting the Reality 55

The choice of the key concept 55
A note on a (possible) controversy concerning the importance of the concept of knowledge 58
Know, *know that*: preliminary observations; *know that* and *know* + Q 60
Know that and *know* + NP 62
Know that and other elements of sentences based on it 64
Know that and *know about _ that* 65
The full form of the functor 'know that' 69
The functor 'know that' as a semantic prime: a general statement and its main arguments 71
Certain special arguments for the primitive nature of 'know that' 75
Primitiveness of 'know that': its behaviour in conditionals 77
Primitiveness of 'know that': its relationship to 'truth' and 'falsity'. The main statements 79
Supplementary statements on the hierarchy: 'know that' – 'falsity' – 'truth' 82
'Knowledge that p' is not "ability to use the fact that p as a reason in one's acts" 86
The problem of "justification of belief" in knowledge 90
Provability of the primitive character of 'know that' 93
Instantiation of 'know that' and the phenomenon of «iteration of 'know that'» or of 'knowing that someone knows that such and such' 98

A note on the relationship between 'knowing that' and 'experience' 100
Iteration of 'know that' and "accessibility of other minds" 102
Non-coreferentiality in (immediate) iteration of 'know that' and single self-embedding of *know that* with one subject: preliminaries 104
Knowledge of one's ignorance and ignorance of one's ignorance 108
Non-coreferentiality in (immediate) iteration of 'know that' and single self-embedding of *know that* with one subject: a solution 110
Iteration of 'know that' and non-uniqueness of subjects of states of 'knowing that' . . . 115
A summary of the basic properties of 'know that' 118
A note on "universals" and "particulars" 122
Supplementary comments on the basic properties of 'know that': "aboutness" 124
Supplementary comments on the basic properties of 'know that': contrast 125
An application of the distinction *a does not know that* vs. *it is not the case that a knows that* 128
An additional comment on contrast 131
Supplementary comments on the basic properties of 'know that': infinity and finiteness aspects of knowledge 132
'Know that' and logical constants 136

III. Necessary Existence of Referents of the Prime 'know that' and Its Relationship to Other Concepts 140

The appearance of the relation 'know that' in all sentences: preliminary observations; the "synthetic *a priori*" 140
Some reservations 143
An excursus on sentences with the prefix *for all I know* / *as far as I know* 145
Necessary existence of the relation 'know that': some further clues 147
The appearance of the relation 'know that' in all sentences: proof [$\varphi \Rightarrow \exists x\, K\varphi x$] 153
The appearance of the relation 'know that' in all sentences: proofs associated with Fitch's paradox, or the Paradox of Knowability. Preliminaries 154
On what is knowable being known. The main statement 157
On what is knowable being known. Supplementary remarks 161
Substantiation of the reduction of 'existence' to 'know that': the effect of coreferential iteration of 'know that' 163
Necessary existence of the relation 'know that': necessary existence of true sentences 165
An excursus on the Liar Paradox 169
Necessary existence of the relation 'know that': proofs of the impossibility of 'no one knows anything' 171
Knowledge and existence; their relationship to necessity 174
An additional note on necessity of existence 178
Necessity: its nature and its varieties 181
Knowledge and speech: the non-necessary nature of language and speech 185
Knowledge, speech, existence: supplementary remarks 187
A note on 'feel' as a variety of 'know that' 191

IV. Multiplicity Based on the Relations 'know that' and 'did' as Constitutive for the Reality. Subjects and Attributes 194

Introduction 194

Multiplicity of epistemic subjects 195
Conclusion 199
The problem of differentiation of epistemic subjects 200
Multiplicity of attributes: 'know that', 'did' 202
A note on the relationship between 'did' and 'causation' 204
'Did' and 'know that' in their mutual relationship: preliminaries 206
Knowledge as "gift" 210
Preliminaries for a discussion of 'did': problems of proportion 212
Preliminaries for a discussion of 'did': implications of proportions; hierarchy of states of affairs 215
Some linguistic clues for "multiplicity of subjects" and "hierarchy of states of affairs" 218
Irreducibility of 'did', or its nature of a primitive concept 221
Irreducibility of 'did': some further tests 224
Remarks on irreducibility of 'did' continued. Its radically non-spatial nature 225
Some further properties of 'did' 229
A note on the structure of exponents of 'did' 231
The importance of the category of action for the multiplicity aspect of the Reality . . . 233
The constitutive role of 'did' in the realisation of multiplicity of epistemic subjects and objects. Preliminaries 236
An account of proper names. Guidelines 240
An account of agentive proper names. Fundamentals 242
An account of agentive proper names continued: some details of non-rhematisability of proper names 246
An additional note on the fundamentals of the adopted account of proper names . . . 248
The formula for proper names of animate entities 250
Proper names and their shapes 253
Residual remarks on proper names and their shapes 257
Additional remarks on agentive proper names and on their present analysis 260
On some ramifications of usage in the field of agentive proper names 264
Proper names and personal identity 266
Closing statements on agentive proper names 271
Proper names of animate and inanimate objects 272
The formula for proper names of inanimate objects; residual comments on their category 274
A note on ascriptive onomastic nomenclature 276

V. Multiplicity Based on the Relations 'know that' and 'did' as Constitutive for the Reality. Inanimate Objects 279

Introduction 279
The fundamental pronouns: 'someone', 'something'. Dualism vs. monism 281
More on the properties of the pronouns 'someone', 'something' 284
The contradistinction of 'someone' : 'something' as a genuine semantic phenomenon; its irreducibility to inflectional facts 287
Pluralism within the domain of inanimate objects: general remarks 291
Some conceptual details concerning multiplicity of inanimate objects 293

Main spatial relations of inanimate objects. Contact, distance 296
Main spatial relations of inanimate objects. Movement 299
Part - whole relation 301

VI. A Summarising Outline of the Basic Structure of the Reality. Theism 305

The schema of the basic structure of the Reality 305
A preliminary statement of theism 308
Theism: a note on the relevant arguments and counterarguments 310
Theism as an analytic claim based on the properties of 'know that' 312
An excursus on the so-called ontological theistic argument 315
A closing statement on the ontological argument 319
Impossibility of the whole of knowledge being distributed among knowers/ignorants . 321
A note on states of affairs that are problematic objects of anyone's knowledge. Counterfactuals 324
A global account of conditionals 326
Subjunctive conditionals, or counterfactuals, vs. indicative conditionals 330
A supplementary note on indicative conditionals 334
Deductions concerning the solution of the alternative of theism and atheism as an analytic support for the theistic claim: preliminaries 337
A deduction concerning the alternative of theism and atheism as allegedly having no known solution 339
A deduction concerning the alternative of theism and atheism as allegedly having the atheistic solution 341
Remarks on the controversy between atheism and theism continued. The issue of the Law of Excluded Middle. Conclusion 343
Analysis of 'believe in' as involving the idea of the Omniscient Being 347

VII. Selected Theological Issues 351

God and the schema of the basic structure of the Reality 351
God and the multiplicity / proportion requirement 355
Substantiation of the multiplicity of God's patients continued 356
The necessary multiplicity of universes; God's creativity 360
The problem of the Trinity. The Pythagorean τετρακτύς 362
Immortality of mortals 367
Theism as a "way of paradox" 369
A comment on alternatives to theism 371
The problem of "theodicy" 376

VIII. Language 381

Introduction 381
"Mapping" as the essence of language 383
The role of knowledge in linguistic epistemic mapping 386
In search for sufficient conditions for linguistic mapping 389
Ascriptions and propositional functions as epistemic objects 390
A note on certain conjectures concerning the distinctive features of language 393
Representation of ignorance 396
Additional remarks on how ignorance is represented 399

The essence of language and differentiation of expressions 401
Naturalistic and non-naturalistic, or supernaturalistic, interpretations of language. Introduction 402
The problem of emergence of language 405
Creationism: introduction 407
Creationism: lack of a natural sufficient condition of language 410
Creationism: lack of a natural sufficient condition of language, continued 413
Creationism: supplementary remarks 416
A caveat on compositionality 418

IX. The Concept 'say that' 423

Introduction 423
'Saying that' and cognate structures: preliminaries 427
'Saying:_' in its contradistinction to 'saying that' 429
More on reports of non-declarative utterances; 'letting know' 430
The nature of 'say that': general statements 433
Objectivity of situations qualifying for the status of 'saying that' 437
Notes on objectivity of situations qualifying for the status of 'saying that' continued: referents of 'say that', or *about*-objects in *say (about) ... that ...* 439
The definition of 'say that' [(DIXIT)] 444
Substantive comments on the definition of 'say that' 447
An auxiliary gloss on the definition of 'say that' 451
Why is it necessary to accept the existence of the separate and irreducible functors of 'saying': the functors 'say that' and 'say: _'? Preliminaries 452
Absence of an operation transforming the quotative functor into 'say that'. Inadmissibility of *say* as a semantic primitive 454
Absence of an operation transforming'say that' into the quotative functor 455
Residual comments on possible operations affecting *say* and on non-primitiveness of say 459
Central consequences of (DIXIT). Prospects of a substantiation of the definition . . . 460
The first central consequence of (DIXIT): "(a said that p) $\rightarrow$ (p $\vee \sim$ p)" 461
The second central consequence of (DIXIT): "no saying without another saying" . . . 464
The central kind of metautterances; saying that *p* as a consequence of one's saying that one says that *p* 467
'Saying that' and 'doing' 469
'Saying that' and the level of informedness of the interlocutors. General facts 473
'Saying that' and the level of informedness of the interlocutors. Addressee's knowledge or ignorance of the truth / falsity of the ascriptions used 478
'Saying that' and addressee's possible antecedent knowledge 480
The problem of so called "inner speech", or soliloquy. Introduction 483
A note on misconceptions concerning "inner speech" and their source 487
Problematic aspects of the concept of "inner speech" 489
A positive general interpretation of "inner speech" 494
The main expressions representing varieties of "inner speech" 497
Residual remarks on the main kinds of "inner speach" 500
Other selected expressions representing varieties of "inner speech" 502

"Inner speech": conclusion 505

X. Language, Logic, Valuation. Preliminaries 507

Introduction 507
Relativism and absolutism 509
Aspects of valuation to be considered 512

XI. Moral valuation 514

The main concepts relevant to morality 514
The concept 'want' 517
The object of necessary universal disapproval 520
Prosoponomy 523
Prosoponomy and morality at large 526
On a certain kind of logically motivated, i.e. universal, evaluative hierarchy in morality 529
More on logical aspects of moral choices 534
Closing remarks on Kant 537
On the proper ontological treatment of moral valuation 540
A remark on the origin of morality 541
A note on the concepts 'good', 'bad' 543
A summarising statement 546

XII. Aesthetic valuation 547

Preliminaries 547
Features targeted in aesthetic judgements: introduction 550
Features targeted in aesthetic judgements: continued 552
Ontological basis of aesthetic valuation: the key role of negentropy 554
Relationship between the ontological basis of aesthetic phenomena and contingent circumstances 557
Aesthetic valuation and the pleasant 560
Aesthetic valuation and the good 562
More on the interface between moral / practical and aesthetic valuation 566
The problem of mutual embeddings of aesthetic and non-aesthetic values 569
Relativistic aspects of aesthetic valuation 572

XIII. Knowledge in Valuation. Valuation of Knowledge 576

Evaluative knowledge and its relation to knowledge as an epistemic object 576
Aspects of immunity of knowledge to evaluation: linguistic clues 578
Valuation of knowledge and non-factive propositional attitudes 581
Reservations 583
Concluding remarks 584

Bibliography 589

Appendix. The author's publications relevant to the scope of the book 601

Name Index 608
